MAKING LIFE BRIGHTER

About us

**AFFORDABLE, CLEAN ENERGY
FOR EVERYONE, EVERYWHERE**

New Fortress Energy, a liquefied natural gas (LNG) company, was founded in 2014 by Wes Edens with the belief that access to affordable, reliable, cleaner energy is not a privilege, but a human right. Universal access to energy can impact major world issues, from education to poverty reduction to gender equality. Creating that access – in an environmentally responsible way – is our fundamental mission.

Our mission

WE WANT TO LIGHT THE WORLD

New Fortress Energy is dedicated to empowering communities where we operate by investing in the next generation of innovators and supporting our LNG communities. We believe this is one of the most powerful ways to help build a brighter future.

Message from our CEO

We're committed to powering the world with positive energy by investing in philanthropic initiatives benefiting our communities, economy, and environment.

Every day, we work to support the UN's Sustainable Development Goals by reducing emissions, improving access to affordable energy, and empowering communities.

Our initiatives contribute to our communities' well-being by addressing health, food security, equality, and environmental concerns. We take pride in supporting our neighboring communities and are excited for another positive, impactful year.

WES EDENS

Founder & CEO

New Fortress Energy

“

neighboring communities
and are excited for
another positive,
impactful year.”**

Our commitment to the UN's Sustainable Development Goals

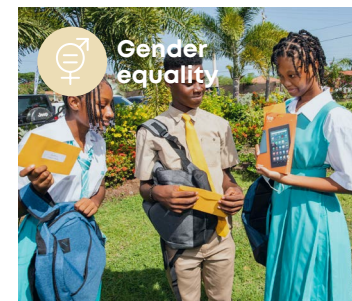

“EXPANDING INFRASTRUCTURE AND UPGRADING TECHNOLOGY TO PROVIDE CLEAN ENERGY IN ALL DEVELOPING COUNTRIES IS A CRUCIAL GOAL THAT CAN BOTH ENCOURAGE GROWTH AND HELP THE ENVIRONMENT.” – UNITED NATIONS

We wholeheartedly support the United Nations' Sustainable Development Goals (SDGs) and are dedicated to advancing them. Our commitment involves providing access to affordable, cleaner energy in areas of greatest need and fostering significant, positive changes within the communities we serve.

UN'S SUSTAINABLE DEVELOPMENT GOALS

Look out for these tags to learn more about how we're supporting the UN's SDGs!

Building a brighter tomorrow

SUPPORTING YOUNG PEOPLE

New Fortress Energy takes pride in its ongoing efforts to uplift the communities in which we operate. Our focus remains on nurturing the next generation of leaders, innovators, and entrepreneurs, particularly in the fields of science, technology, engineering, and mathematics (STEM) education.

Awarding 56 engineering and STEM students

For the 2023 academic year, NFE awarded tertiary scholarships, valued at \$266,280, to 56 students completing their first degree in engineering or a STEM discipline at The University of the West Indies, Caribbean Maritime University, and the University of Technology, Jamaica. The announcement was made at an official handover held at the Regional Headquarters of The University of the West Indies in February 2024.

Receiving this scholarship serves as a beacon of opportunity, offering the means to pursue my passion for chemical engineering without the financial constraints that typically accompany higher education.”

Imani Pryce

1st year, Chemical Engineering, UTECH

“The Foundation’s unwavering commitment to supporting students like me, who are striving to make a difference in their communities, aligns profoundly with my own goals. This scholarship is more than just financial assistance for me; it’s an affirmation of my abilities and a significant investment in my future.”

Georgina Campbell

4th year, Logistics & Supply Chain Management, CMU

Starting the new school year on the right note

Roughly 1,000 students at the infant, primary, and secondary school levels across Clarendon, St. James, and St. Catherine in Jamaica received back-to-school financial aid totaling \$64,000 to purchase uniforms and other school supplies. The financial aid packages also included backpacks, notebooks, and other school items to help them start the new school year on the right note. In addition, approximately 800 students received free medical examinations, while 60 high school students received bursaries valued at \$19,000 to cover the cost of tuition and external examinations needed to matriculate to college.

“

Hearing the engineering interns speak and share their experience was very impactful and highlighted the possibilities that exist in the world.”

Ohemma Blake

Upper 6th form,
Old Harbour High

“

Back-to-school is often a very tedious and difficult time for many parents and caregivers within the community. I would like to commend NFE for taking the initiative and giving back, as each assistance provides a cushion of support for us as parents.”

Tadeen Ebanks

Parent,
Old Harbour Bay

Packing school bags for back-to-school

More than 2,000 students were able to enjoy a much-needed treat ahead of the new school year thanks to New Fortress Energy and its annual back-to-school fairs. The fairs, held in the Port and Refinery Council communities in Clarendon, Old Harbour Bay, and Montego Bay, St. James in Jamaica, where NFE has its LNG plant operations, treated the students to rides, entertainment, and their favorite foods. The students also received free medical check-ups and school supplies in preparation for their new school year.

“

The impact of this initiative is far-reaching. I must commend New Fortress Energy for its forward-thinking approach; for taking care of Jamaica's future by taking care of our youth. An educational investment is the best investment for our country.”

George Goode

Principal,
Old Harbour Primary School

Hosting a well-deserved graduation ceremony

Upon completion of the work-based learning program at the Old Harbour Bay Development Center in St. Catherine, Jamaica, 15 allied healthcare students and six data entry students celebrated a significant milestone when they collected their certificates at the skills training graduation ceremony. In 2019, the New Fortress Energy Foundation provided the community center with much-needed resources such as hairdressing and cosmetology equipment, barber chairs, and ceiling fans.

The school trains unskilled youth who were unable to complete their high school education. Since the 2016 start of the work-based training programs, more than 500 unskilled youth have graduated and are now either working or have become entrepreneurs in their fields. All programs are professionally certified by the HEART NSTA Trust, which is recognized by companies across the corporate, industrial, hospitality, and manufacturing sectors.

“

It is always rewarding to see the students at graduation. This is the culmination of challenges conquered and stories of resilience leading to success.”

Reverend Sandra Nembhard
Chairperson,
Old Harbour Bay
Development Center

“

Being certified enables me to seek jobs in the field, and that gives me hope.”

Boosting STEM with Mathematical Olympiads sponsorship

New Fortress Energy Foundation was delighted to pledge approximately \$6,400 to sponsor the Junior Mathematical Olympiad and Senior Mathematical Olympiad in Jamaica for the third consecutive year. The Department of Mathematics at The UWI, under the wider Jamaican Mathematical Olympiad (JMO), organizes and executes these Olympiads. The Senior Olympiad, which started in 2010, is open to students in grades 7 to 11, while the Junior Olympiad, which was added in 2011, is open to students in grades 4 to 6. The aim is to connect with high school and primary school students who are engaged in mathematics. In the 2023 staging, more than 2,300 students entered the qualifying round of the Junior Olympiad, while close to 500 students entered the qualifying round of the Senior Olympiad.

With mathematics at the core of every STEM discipline, the aim of the Mathematical Olympiads is to target students from very early on to help them develop a better appetite and appreciation for the subject.”

Professor Ian Boxill

Deputy Principal,
The UWI Mona

“

It was encouraging to see the commitment and excitement on the faces of the students as they turned out for each round.”

Dr. Nagarani Ponakala

Head of the Department of Mathematics,
The UWI Mona

Welcoming engineering interns to our summer program

We were thrilled to welcome 20 engineering interns as part of our annual summer internship program in Jamaica. The interns worked across our facilities including CCHP in Clarendon, our Montego Bay LNG facility, and our Old Harbour Offshore Terminal, which also gives them training exposure to our floating storage regasification unit in Portland Bight.

“

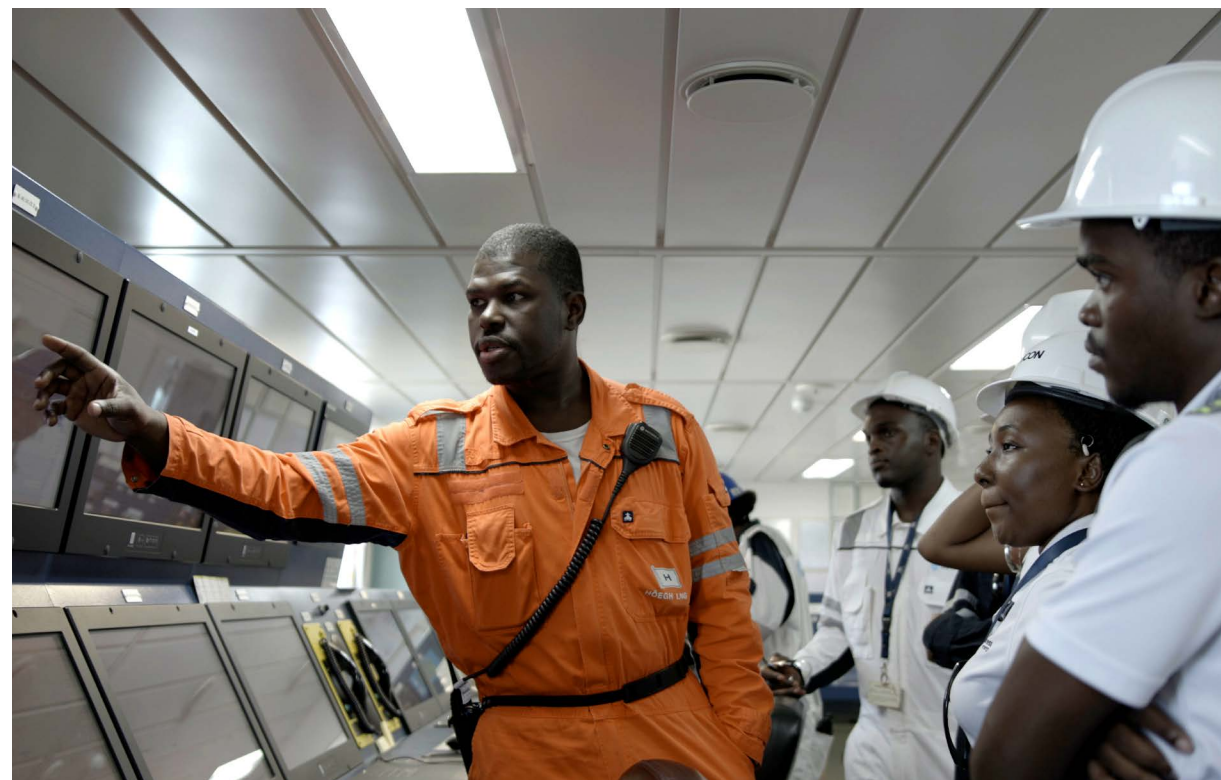

The past few months have been truly transformative. One of the most significant takeaways has been the seamless integration of theoretical concepts into practical applications.”

Jada-Rochelle Walker,
Mechatronics Engineering, CMU,
Old Harbour Offshore Terminal

“

The exposure to real-world projects, alongside the guidance of the talented team, has allowed me to apply classroom knowledge to practical situations, bridging the gap between theory and practice.”

Ravoun Gordon
Mechanical Engineering,
The UWI,
Small-Scale Operations

Adopting a school in Mexico

NFE participated in the Adopt a School program in La Paz, Mexico for a full school year, providing resources to six local schools to help with maintenance and basic functional needs.

NFE helped sponsor six PEMs (champion teachers) in support of their journey to transform the educational situation and perspective of school students from January through December 2023. After receiving special training, these teachers train other teachers in their schools, creating better knowledge and tools for the educators to help their students learn.

Be healthy, be well, be energized

MAKING LIFE BRIGHTER

We are dedicated to enhancing the welfare of both our people and the planet. Recognizing the profound impact of energy access on food security, well-being, and educational opportunities for children, we strive to implement relief initiatives with a focus on food security and health and wellness. Additionally, we are steadfast in our commitment to promoting sustainable practices, fostering celebration, and acknowledging excellence.

Keeping an eye on children's futures

What began as an initiative to conduct eye screenings for school children in communities near our facilities in Brazil has evolved into a comprehensive family program aimed at promoting school attendance and fostering a passion for reading.

“

Everybody wins when these projects happen. The community, because it is something that we need, and the company, because it shows they walk the talk and care about those around them.”

Mário Assunção

President,
Quilombola Community,
Gibrié de São Lourenço

Supporting professional fishing courses

Partnering with the Brazilian Navy, we offered professional fishing courses for 28 students from local communities. Instructors from the Amazon Port Authority taught more than 200 hours of classes over 10 days. Students who completed the course received a Professional Fisherman diploma and a fishing boat license.

“

Members of this community have a strong connection with the river and fishing activities. This course was very positive to all of those who received their diploma.”

Angela Vieira
President,
Community Center

“

With this partnership, we were able to train the students with activities they may encounter in their daily lives, including navigation awareness and safety.”

HOURS OF CLASSES

Training students for success

NFE, in partnership with SENAI, the Brazilian National Service for Industrial Learning, offered eight professional qualification courses to 190 students. The courses focused on work qualification for young adults and new job opportunities for women. Those who completed the courses received diplomas and were qualified for entry-level jobs in areas such as human resources, industrial mechanics, industrial electrics, and tailoring.

Gifting holiday smiles

More than 300 children who are either abandoned, orphaned, or disabled in western Jamaica state care facilities smiled a little brighter after receiving Christmas gifts from our team, just in time for the festive holiday season. We donated toys, food packages, personal care items, and other gifts to children living at the West Haven Children's Home, Blossom Gardens Childcare Facility, and SOS Children's Village.

“

Thanks to their donations, the children here at the home will undoubtedly have a memorable Christmas holiday as we know they'll enjoy all the toys and goodies that NFE brought for them.”

Sydney Grant
Manager,
West Haven
Children's Home

Delivering holiday joy

We teamed up with NGO Food for the Poor Jamaica to bring joy – and meals and other supplies – to 600 families on the government's Program of Advancement Through Health and Education (PATH) in Old Harbour, Clarendon, and Montego Bay. Their holiday baskets included chicken, Christmas cake, cooking oil, canned foods, peas, dried food supplies, milk products, cereals, and personal care items such as bath soaps, toilet paper, rubbing alcohol, hand sanitizer, masks, and toothpaste.

“

After my house was burned down, my nephew took me in to live with him, so this will be a big help for the two of us.”

Covely Grey

70-year-old retired fish vendor,
Old Harbour Bay

“

It's always a pleasure to work with New Fortress Energy at this time every year to deliver hope in a package to so many families. We're happy that their heart of service matches ours, which makes it a joy to work with them.”

Celebrating Earth Week

During Earth Week in June, NFE partnered with Lixo Xiki, a Brazilian NGO focused on empowering women by transforming trash into objects they can sell. We donated all recyclable material from our power plant construction to the women, who transformed the material into bags, backpacks, pencil cases, totes, and more.

Meet Caipora! This sloth was rescued and nicknamed by our local team. Caipora, in tupi-guarani, an indigenous language, means creature of the forest.

The Amazon Forest is one of the sloth's natural habitats, and some animals wander from the forest into our construction site. If this happens, we have strict environmental and safety procedures that must be followed. The animal is rescued, checked by a vet, photographed, catalogued, and returned to its habitat by a team of specialists. Usually, our team sees lizards and birds; a sloth rescue is very rare.

Supporting local traditions

NFE was excited to serve as one of the main sponsors for the annual Abacaxi Festival in Barcarena, Brazil, celebrating the symbolic and historic value of the pineapple. Every year, this huge festival has been held in honor of the 300 tons of pineapples harvested. For three days, cooking contests, concerts, sports competitions, and free activities fill this vibrant city.
